Course Reports

2020 Beginners Course (March through June)

The Class of 2020 - our Beginners - have all graduated successfully. With some final 'hands-on' sessions towards the end of June, all students are now flying solo with their bees.

The Beginners started their journey with us just before 'Lockdown' was imposed, so this year's training has been particularly challenging to ensure all were prepared for their first steps in beekeeping. And as us more experienced beekeepers will know, their learning has only just begun! Each student will now be assigned a Mentor, and also have the backup of our volunteer Apiary Team should they need it.

Congratulations to all our Beginners for taking on this endeavour - we wish you well and hope to see you throughout the rest of the season, and into our Winter series of talks etc.

If this has inspired you, and you would like to become one of our 2021 Beginners, please get in touch with your email address to register for more information and further updates.
